## ELEMENTS

BATH | LIVING | COUNTERTOPS | FURNITURE | WASHBASINS

**ELEMENTS** is a concept by a company called MAKRO. It is about making pre-designed installation walls, benches, shelves, bathtubs and sinks of bespoke dimensions that must subsequently be finished. Finishing might consist of tiles, natural stone, Corian, glass, micro cement, wood etc.

There is a great selection of options for further finishing which can also be ordered as a pre-cut which only needs to be glued after installation.

**ELEMENTS** has some ready solutions for washbasin and bathtub models that can be used as a starting point - where you can build your own custom design from.

THERE IS A GREAT SELECTION OF OPTIONS FOR FURTHER FINISHING WHICH CAN ALSO BE ORDERED AS A PRE-CUT WHICH ONLY NEEDS TO BE GLUED AFTER INSTALLATION.

Every product is immediately ready to clad

The main difference to the products of our competitors is that ELEMENTS can be clad immediately and doesn't require ANY further application or strengthening of the surface to apply the cladding,

## LATEST GENERATION OF TECHNO PVC

ELEMENTS consists of TechnoPVC and EPS layers. EPS - expanded polystyrene = a cellular plastic. This material consists of 98 percent air and 2 percent polystyrene. It provides some special shock-absorbing and insulating properties.

## ADVANTAGES

- You are saving on craftsman working hours as ELEMENTS are easy to install and ready for further finishing;
- ELEMENTS can be designed precisely to your custom measures and will only need to be mounted on site and then finished. You are saving both craftsmen and architect time.
- There is a possibility for pre-installed light - in niches, under bathtubs, sinks, etc.
- When having a big reconstruction project it will be easy to create matching designs in all rooms and calculate prices for the execution of the whole task.

## ELEMENTS

### BENEFITS

- Smart and well-thought-out drainage systems in sinks and shower trays;
- Does not weigh more than 2 persons can handle;
- Insulating material is an advantage for bathtubs that only lose approx. 1 degree per 20 min. It also reduces reverberation;
- Installation walls, cistern boxes, shelves, benches, and other elements are made with precision to ensure that they fit perfectly together.

## ELEMENTS FOR DESIGN

- / 1 TAILOR MADE BATHTUBS
- / 2 SHOWER-TRAYS
- / 3 WASHBASIN AREA
- / 4 TECHNICAL AREA
- / 5 STEP
- / 6 SEATS
- / 7 NICHES
